*The Legacy of Militancy in Punjab: Long Road to ‘Normalcy’*
Inderjit Singh Jaijee & Dona Suri,
New Delhi: Sage Publications, 2020,
213 pp., ISBN 978-9352806287

The phases of militancy and “normalcy” in Punjab have been the most debated and contested terrains in the recent scholarship on Punjab. Different scholars, while perceiving the legacy of militancy from various perspectives, have constructed different and, in some cases, even contradictory perceptions with regard to the ramifications of this period of violence. This book authored by Inderjit Singh Jaijee and Dona Suri presents an original, objective, and comprehensive mapping of the undercurrents of the militancy and post-militancy era in Punjab. In particular, it focuses on the lasting political, economic, and socio-cultural effects of the period of militancy which continue to negatively affect the period of post-militancy (or “normalcy”) in Punjab.

The book provides a chronology of events sequenced from 1984 onwards up to 2020 in explaining the political personalities, processes and perceptions related and relevant to the era of militancy and post-militancy. The book amply describes how key, previously unrealized, players in the state have acted to create a sense of “normalcy.” For example, various “mafias”---whether liquor, transport, or mining---have emerged over a period of time under political patronage. There has also been a rising tide of illegal migration of youth to foreign shores because of political and economic turmoil. Indian democracy is increasingly influenced by business tycoons, often closely associated with the political bureaucracy. Dynastic politics, including the selection of candidates on basis of family lineage (so-called “blue blood”) rather than coming from the grassroots has increased intra-party conflicts. Grassroots leaders and “outsiders” are hence unwelcomed in politics, leading to unresponsive and dysfunctional democracy in Punjab. As a result, reformist agendas have been picked up by new groups emerging from middle class concerns such as the Am Admi Party (AAP) but it has been largely unsuccessful in dislodging the traditional Akali Dal and Congress, which continue to hold the reigns of power supported by cronies in the judiciary and bureaucracy. Challenges to these traditional political structures are often labelled “Khalistanis” by the dominant national media. These are some of the new concerns (or
perversions to democracy) emerging from militancy and the new phase of “normalcy” that are highlighted by the authors of this book.

The book begins with a chapter titled “Normalcy” which explains how the term “Khalistan” evolved as a political point of contestation, owing its origin to media-frenzy behavior. The conditions lay bare the political crises that eventually engulfed the state. The actors, be it the central government headed by Indira Gandhi or the state government headed by incumbent ministers, were playing game of political music chairs. The Akalis added to the mix with agitations such as Rasta Roko, Rail Roko, and Nehar Roko. The centre did not pay heed to the regional demands that were being generated in Punjab. The Green Revolution, which was once considered to be the magic word of development promoted by the state, was fading. The chronology of politics demonstrates the destructive competition of two political parties---the Akali Dal and Congress---polar opposites of each other in ideology. The result of Operation Bluestar. These two parties continue to rotate in and out of power even during the post-militancy period of “normalcy,” without bringing any significant change at ground level. Realities are same or have actually become worse than earlier, and no solutions seem to be in sight for the so-called democratic governance apparatus. No fruitful discourse has emerged to sustain the legacy of Punjab and introduce new political ideas into the future. In fact, the political elite in Punjab, irrespective of party, are dominated by traditional, landowning “sardari families” who send their children to boarding schools and are thus a socio-economic class apart from most of the Punjabi populations. As the authors show, they use their political clout, kinship networks, and matrimonial alliances to consolidate their family and political power in the state.

The chapter on “Due Process: Punjab” highlights how the unprincipled promotion of political cleavages in society based on religion and ethnicity catalyzed the “Punjab crisis.” To overcome the unfortunate post-1984 political problems, the central state then systematically created draconian laws to clamp down on democracy and use extrajudicial means such as “faked encounters” to restore law-and-order and construct an eyewash for its political failures to the detriment of those living in Punjabi society. The genuine demands of the Punjabi people were covered up by the nomenclature of terms such as “separatists,” “the militant agenda,” and “extremism.” The repressive central state came to function through various ordinances and promulgations as deemed desirable to further strengthening its agenda of ruling by hook or crook. Newly introduced acts such as TADA were torturous in disabling the activities of those who questioned why
the state acted as the supreme entity in all matters and how they were supposedly lesser citizens. These laws were the entry doors for ruthless government professionals who played tricks of evidence and confession to undermine the innocence of youth. The broad categorization of a “terrorist” came into being for repressive (and sometime lucrative) purposes. Torture, extrajudicial killings, and illegal confinement were run by the police and security forces, and their victims were denied the basic right of existence and many of them passed away into oblivion. These illustrations can be compared to problems which emerged later in other regions of India. The kind of treatment Punjab received, being stigmatized for no fault of its own but rather crisis, came from top-down (centralized) approach toward Punjab’s issues.

This book provides gruesome detail of those people branded as “terrorists” or declared as being “anti-national.” Many innocent Sikhs became victims of state-sponsored violence and corruption. The case studies in this book provide ample evidence of how property and wealth were attached on the pretext of being products of “terrorism,” and how many police officers openly indulged in capturing this booty. The events which unfold also saw the spectacle of the glorification of police officers, as they were given coveted postings and position. The case of SSP Ajit Sandhu, who was involved in many extrajudicial killings and yet “escaped” legal repercussions by supposedly committing suicide, is well documented in this chapter. Sandhu sought sadistic pleasure in gruesome cold-blooded murders of unaccounted persons and got decorated with medals and promotions. Those who tried to expose the acrimonious agenda of the police such as Jaswant Singh Khalra were also hunted, tortured, and eliminated. Their cases are still lingering in the judicial system. The term “extrajudicial killing” became the matter of a day which was linked to parties, prizes, and promotion for police officers.

The chapter “Due Process: Delhi” examines the 1984 anti-Sikh pogroms and subsequent travails of its victims. It also provides the backdrop of 1984 pogroms in which the state failed to defend the innocent Sikhs being killed in most cities across north India and, in fact, may have aided and abetted this violence. In fact, both Congress and BJP activists may have been involved in this violence, which the book examines. New dimensions have been added to the tragedy, as previously unknown sites such as Hondh Chilhar and Patuadi in Haryana have been identified by human right activists, who have sought information under Right to Information Act. The title for this chapter is “due process” which is satire on the existing system. In fact, insufficient “due process” has been given to
the victims of these pogroms after long decades of court hearing and many have
died of old-age awaiting “justice.” In fact, the chapter details how the riots may
have eventually been a golden egg for real estate investors and projects in the
affected areas, who attained prime property at lower rates after the dislocation of
their community residents.

The economic dimension of the era of both militancy and also post-militancy (that
is, “normalcy”) is a particularly interesting theme in this book. For example, the
chapter titled “If You Can’t be Good” provides insights into the rags-to-riches
stories of police officers who confiscated the properties of so-called “terrorists”
under TADA, and become rich with these ill-gotten gains. This chapter also
provides empirical evidence of how real estate values mushroomed upward as a
byproduct of “terrorism” and “counterterrorism,” especially for those who were in
power and had close political connections. This networking led to the formation
of the so-called PPP (police, patwari, and property dealer) gang. In some
instances, NRIs in the Doaba belt became the soft targets of this unholy business
alliance operating under the guise of fighting militancy. Newspapers eventually
carried stories of the open trading of such confiscated properties referred to as
“Game of Golden Goose.” This type of scenario also carried into the post-
militancy phase of “normalcy,” including the encroachment of land in villages
near north Chandigarh adjoining Punjab. As this book points out, the whole
process of illegal land deals is subjected to changing hands with the dirty money
of politicians and government officers. This “colonization” of spaces becomes an
important strategy in the supposed liberal investment friendly scenario dominated
by government elites. Thus, the no “normal” in Punjab is a direct result of the era
of militancy.

This book also covers the cultural effects of militancy into the subsequent era of
“normalcy” in a fascinating fashion, particularly in the chapters “On the Cultural
Front” and “Khalistan Redux.” This includes cultural memorabilia related to
Punjab’s decade of militancy now innocently plastered on T-shirts, car decals, and
posters such as those of militant leader Sant Jarnail Singh Bhindranwale who is
idolized by Punjabi Sikh youth who did not experience the dark days of militancy.
Pollywood songs offer a glimpse of history not presented by academicians in such
a chic manner. The “ethnification” of Sikhs through music, including advertising
their issues and demands, have played an important role in staging Sikh identity to
youth in both Punjab and the diaspora. Cinema movies play a particularly
important role in this sense. The characters in these movies depict the suffering
and atrocities committed by the state such as torture and extrajudicial killings.
Some movies show victims of 1984 riots, and their uprooting and moving to safe places in Punjab. “Historical memory” plays an important role in facilitating information regarding the values of freedom and liberty that have been important markers for Sikh community rather than being affected by the homogenization processes of the Indian state. The wounds of 1984 are memorialized in Punjabi-language films *Punjab 1984* and *Saada Haq*. The 1996 Hindi movie *Maachis* also documented the episodes of terrorism and corrupt politicians. It questioned democratic credentials of the Indian state, and showed the displeasure and dismay among the Punjabi youth during those turbulent years. This book captures both the consumer culture around these cultural modes of expression, and also their deeper social meaning.

In conclusion, Jaijee and Suri’s book is a refreshing work of research and presentation on various aspects of militancy and “normalcy” in Punjab, particularly emphasizing how the current mode of “normalcy” has actually been conditioned by the previous period of militancy. This book is must for both academicians and educated readers in general to understand contemporary Punjab beyond militancy, not only in a political sense, but also other socio-cultural and economic concerns that are important, but that have been sidelined when dissecting the Punjab problem and its aftereffects. These points have all been well taken by the authors, hence adding new a dimension to the writing on the “Punjab problem” and providing holistic view of post-militancy “normalcy” in Punjab. As the authors emphasize, this is not the “old normal” but the “new normal” conditions by the era of militancy.
